

Dear Resident

Subject: Relocation of a Major Pipeline

The future rehabilitation of the I-40 Bridge over SE 15th Street requires that a major petroleum pipeline be relocated. The contractor will begin on the north side of I-40 and bore a line to the south side. The bore will terminate on Vickie Drive at approximately SE 18th Street. At that time a steel pipe will be pulled back through the bore hole from the south to the north.

As you can imagine, this work will require large equipment operating in the tight area of Vickie Drive. The work includes a fairly large hole being dug in Vickie Drive in the vicinity of SE 18th Street. To safely conduct this work, Vickie Drive will have to be closed for both north and south bound traffic at SE 15th Street and again just north of the Church of Christ on Vickie Drive. Access for local traffic for residents on SE 17th and SE 18th Streets will be maintained.

The contract plans to begin mobilizing on the north side of I-40 on May 4, 2018. Vickie Drive will be closed very shortly thereafter. The expected time for the work is seven weeks.

We realize this will cause an inconvenience, but the work is necessary for the future I-40 bridge rehabilitation project. Your patience is appreciated.

For additional information I can be contacted at 671 2874.

Sincerely,

William Graham
City of Del City
Public Works Director
