Del City Fire Department to Close Fire Station #2, Remove The Rescue Unit from Service

(Del City, OK) Effective immediately Fire Station #2, located in the southern part of Del City, will be closed and the Rescue Unit removed from service due to budgetary constraints. No firefighters will lose their jobs and those firefighters assigned to Station 2 will be relocated to Fire Station 1. The following is a statement from Fire Chief Jim Hock:

“The Del City Fire Department has always provided a quality response for our community for all types of incidents, both emergency and non-emergency. However, we find ourselves in a challenging situation that requires us to operationally structure our Department by closing Station 2, removing the Rescue Unit from service and placing those firefighters on the two in-service pumping apparatus. Unfortunately, we are in the perfect storm; budgetary constraints, loss of sales tax revenue, retirements and a loss of firefighters to other fire departments. We will continue to provide fire protection and medical response with minimal impact to our citizens.”
